Environnemental Solutions & Services

Hazardous waste: treatment solutions on site and at our facilities

Over 25 years' of experience

Séché Environnement has been providing highly efficient and innovative solutions for waste recovery and waste processing for more than 25 years, covering all types of hazardous waste (halogenated, flammable, reactive, corrosive, toxic, CMR, etc.):

- Process or incidental liquids
- Solid, pasty or gaseous hazardous wastes
- PCBs, PCTs, and POPs such as pesticides
- Petrochemicals (tank residues, oil-contaminated, soils and water, sludge, etc.)
- Dangerous gas bottles and containers.

Partnerships with gov- ernments and supra- national organizations

Through its international division, the Group is a leading actor in the application of the Stockholm Convention on worldwide POP disposal programs (pesticides, PCBs, etc.).

Know-how, innovation, risk management

Turnkey solutions in hazardous waste management

Séché Environnement offers a wide range of solutions in hazardous waste processing and recovery:

- High-temperature specialized incineration
- Decontamination of transformers containing PCBs
- PCB dechlorination
- Sludge dewatering
- Solvent regeneration and purification of chemical intermediaries
- Decontamination and remediation of industrial sites and polluted soils
- Physical-chemical treatment
- Intractable hazardous waste storage
- Toxic gas treatment
- Weapons destruction
- Secure collection.

The best solution with the best available technology on our sites

All our treatment facilities meet the most stringent regulatory requirements and integrate sustainable development values. All of them are ISO 14001 certified.

Dedicated logistic services for waste transfer

- Analysis
- Collection
- Packaging
- Transport (ADR, IMDG, RID, IATA)
- Administrative support (Basel Convention)

Our know-how and technologies on your site

Séché Environnement offers its expertise to companies and local authorities to develop sorting, recovery and treatment facilities adapted to specific geographical constraints:

- Market and feasibility studies
- Sampling and analysis
- Finding the best available technology
- Administrative support
- Communication about the project
- Design, construction and commissioning of the unit
- Outsourced management of the facility.

Emergency response

Specialized teams intervene to clear up chemical emergencies

Séché Environnement is ready to deploy fully-trained clearance teams anywhere in the world as soon as chemical emergencies occur. We manage clean-up operations up to final treatment, including organizing communication to local and international communities.
