Environnemental Solutions & Services

Site remediation

A single point of contact

Sêché Environnement offers you a team of environmental specialists and risk management experts, ready to take charge of every stage of site remediation.

A multi-skilled operator

- Asbestos removal
- Demolition
- Environmental remediation (on-site, off-site, containment)
- Waste water management (sludge, liquids)

Real added value

Entrusting your site management to Sêché Environnement is the key to reaching the remediation level desired, leaving you free to concentrate on your core business.

Tailor-made environmental solutions

As a leading industrial environmental services group, Séché Environnement gives you the benefit of a single point of contact to manage all your site remediation needs. Our high environmental standards are your best guarantee for the quality of the results obtained.

Our expertise in prevention and risk control and our extensive know-how enable us to offer you tried-and-tested as well as highly innovative solutions. Taking advantage of our materials recovery skills and our extensive knowledge of all types of waste, waste water and soil treatment, you are sure to achieve the desired results.

We provide full support throughout every project (internal and external communication, administration, sizing, etc.).

Site remediation

- Operational feasibility
- Technical and economical sizing
- Pilot-tests in the laboratory and on-site
- Remediation works
 - Safety procedures
 - Demolition
 - Radiological clean-up
 - Asbestos removal
 - Environmental remediation
 - Waste management
 - Waste water management
 - Containment
 - Landscape rehabilitation

Contaminated sites and soil treatment

Our expertise in waste management enables us to offer you solutions for the treatment or recovery of soils or contaminated materials that are optimal, both economically and environmentally.

- On-site treatment of soils and groundwater: venting/bioventing, sparging, pump and treat, chemical oxidation, etc.
- On-site treatment of contaminated soils: biological (hydrocarbons, solvents, etc.) and physico-chemical (mercury, chrome, lead, etc.)
- On-site waste water management: physico-chemical treatment (TSS, materials, hydrocarbons, etc.) and volume reduction
- Management and optimization of waste elimination: storage, thermal treatment, recovery, etc.

Designer, builder and operator

Through our subsidiary Séché Eco Services, our customers benefit from our experience and know-how in all areas related to waste water management. The Group offers solutions based on delegated management or one-off interventions:

- Engineering, design and construction of industrial sewage treatment plants
- Operation, maintenance or operational assistance of industrial sewage treatment plants
- Optimization of flow management (volumes, process, operating costs, etc.)
- Global approach to recovery and sludge elimination
- Know-how from our laboratories and the Group's R&D department
- Temporary mobile solutions (inventory reduction, emergency interventions, station shut-downs).
